Work Experience

Backend Developer & Resume Specialist @ *AplyEase* — Mar 2025 - Present

- Spearheaded backend development on the main company platform, engineering 3+ core AI agents including an ATS score checker, a cover letter generator, and a resume tailor using Java and REST APIs.
- Revamped and optimized over 1,000+ client resumes, systematically elevating average ATS scores from under 50% to over 90%, directly leading to a significant increase in client interview callbacks.
- Championed remote team collaboration and accelerated project delivery by leveraging a suite of AI tools (ForgeHire, ChatGPT, Gemini), streamlining workflows and improving team efficiency by over 30%

Projects

AI Resume Maker — Jul 2025 - Aug 2025
Tech Stack: Java, Servlets, JSP, Ollama, LaTeX, MySQL

- Orchestrated a full-stack resume platform using a 4-tier Java architecture, pioneering the integration of a local Llama LLM to guarantee 100% data privacy by eliminating external API calls.
- Devised a sophisticated document generation engine using LaTeX to programmatically render AI-driven content into pixel-perfect, ATS-compliant PDF resumes, reducing manual formatting effort by 100%.
- Engineered a cohesive end-to-end user journey, consolidating a multi-stage process of data entry, AI processing, and PDF delivery into a single, seamless workflow managed by a robust Java backend.
